

What is TED?

Managed by the Office of the Deaf and Hard of Hearing (ODHH), the Telecommunication Equipment Distribution (TED) program distributes specialized telecommunication equipment that enables Washington residents to use the telephone independently.

Who can use TED?

People (ages 4 and up) who are certified as deaf, hard of hearing, deaf-blind, or speech disabled; AND live in Washington State are eligible to apply.

How can I apply?

Contact ODHH as listed and request a TED application form.

TED Program Manager:

Kelly D. Robison, CPM
robiskd@dshs.wa.gov

Toll-free: 1-800-422-7930 V/TTY
(360) 902-8000 V/TTY

What other Programs and Services does ODHH offer?

- Telecommunication Relay Service

What are the telecommunication equipment options?

Amplified Telephone

The Ameriphone XL40 Amplified Telephone is designed for individuals with moderate to severe hearing loss. The volume and tone can be adjusted to meet the individual's specific needs.

Teletypewriter (TTY)

The Teletypewriter (TTY) allows an individual to send and receive messages by typing. Messages appear on a display screen and can also be printed on paper.

Remote Control Speakerphone (RCS)

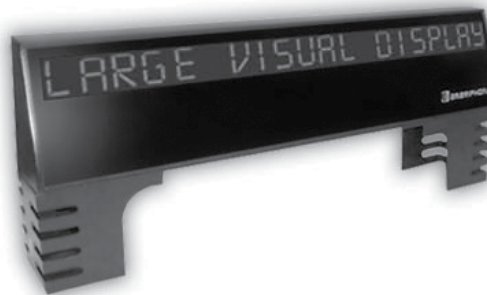

The Remote Control Speakerphone (RCS) is a "hands-free" speakerphone for use by individuals with mobility limitations who also have a hearing loss or speech disability.

Voice Carry Over (VCO) Telephone

The Voice Carry Over (VCO) Telephone by Ameriphone allows an individual to read the incoming conversation and verbally reply, without typing their responses. VCO calls are placed through the Washington Relay Service. VCO benefits individuals who have difficulty understanding spoken conversations over the telephone.

Large Visual Display (LVD)

The Large Visual Display (LVD) is a large display screen that connects to either a TTY or VCO Phone. Individuals with low vision find the large display much easier to read than the standard TTY or VCO display.

Signaling Devices

The **Lighted Ring Signaler (LRS)** is a device which causes a lamp to flash when the telephone rings.

The **Audible Ring Signaler (ARS)** is an adjustable loudness ringer that plugs into a telephone jack.
